Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102(e)

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Reisinger et al., “hereinafter Reisinger”, (PG Pub. No. US 2004/0028589).

Reisinger discloses a catalyst containing a layer on an inert carrier body comprising noble metals from the platinum group deposited on support materials, wherein the layer comprises platinum deposited on compounds selected from the group consisting of metal oxides including mixed oxide of zirconia/ceria (see page 5, claim 1). The support further comprises ceria/zirconia mixed oxide, which is stabilized with praseodymia, yttria, neodymia, lanthana or mixtures thereof (see page 5, claims 4 & 5). The zirconia/ceria (or zirconia-rich) contains at least more than 50% by weight of zirconia, and the balance is the stabilizer, such as lanthana, yttria, etc. (see page 2, paragraph [0018]). The support also contains ceria/zirconia (or ceria-rich) with ceria being contained in the amount of from 60 to 90 wt.% relative to the weight of the mixed oxide, and the stabilizer can be contained in this mixed oxide in the amount of from 0.5 to 10 wt.% relative to the total weight of the stabilized material (see page 2, paragraph [0019]).

Art Unit: 1754

There is no patentable distinction seen between the claimed catalyst and that disclosed by Reisinger. Thus, the claims are anticipated by the teaching of the reference.

Citations

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. All references are cited for related art. See PTO-892 Form prepared.

Conclusion

4. Claims 1-4 are pending. Claims 1-4 are rejected. No claims are allowed.
